PAS TECHNOLOGIES RECEIVED BEST EMERGING BUSINESS IMPROVEMENT DEPLOYMENT AWARD AT THE GLOBAL SIX SIGMA SUMMIT

Kansas City, MO., – October 20, 2008 – PAS Technologies announced today that it has been selected as the winner for the Global Six Sigma & Business Improvement Awards in the category of “Best Emerging Business Improvement Deployment.” The award was accepted on behalf of all PAS Technologies’ employees by Robert Weiner, President and CEO at the WCBF 2008 Gala Awards Dinner and Ceremony on Wednesday, October 15th at The Gaylord Palms Resort and Convention Center in Orlando, Florida.

Robert Weiner, President and CEO said. “This award is a testament to the hard work and dedication of our employees. The great thing is that when PAS Technologies wins awards for process improvements, it is an indication that our customers are winning, too – through the best delivery times, quality and customer satisfaction.”

Robert Weiner, President & CEO, PAS Technologies Inc.

The Global Six Sigma & Business Improvement Awards are given to companies and individuals who demonstrate the most outstanding organizational achievements through the deployment of business improvement programs. The focus of the awards program is to demonstrate to the global business community the real results and excellence that organizations achieve through the successful deployment of Six Sigma and other business excellence programs.

A privately held corporation headquartered in North Kansas City, Missouri, PAS Technologies Inc. (www.pas-technologies.com), specializes in providing cost-effective repair and overhaul solutions for the aerospace, oilfield and industrial markets. By using innovative and proprietary high-technology repair processes, along with repair solutions licensed from OEMs, the company saves its customers from having to purchase costly replacement parts. It services a broad range of components, including gas turbine engines, critical airframe parts, gates and seats used in oil fields, specialized provider of services to the power generation industry, and components used in other industrial high-wear, high-heat and highly corrosive environments.
