PAS TECHNOLOGIES SIGNS SERVICE CONTRACT WITH BOEING

Kansas City, MO., – July 2, 2007 – PAS Technologies Inc., announced today that it had been awarded an eight-year contract with Boeing Commercial Airplanes to supply B737NG Inboard Trailing Edge Flap, Main Inboard Tracks.

In addition to this new contract, PAS Technologies also supplies cost effective repair of flight control and landing gear components for the worldwide fleet of Boeing Airframes 727, 737, 757, 767 and 777 offering its wear resistant HVOF coatings, in addition to performing manual repairs and service bulletins.

A privately held corporation headquartered in North Kansas City, Missouri, PAS Technologies Inc. (www.pas-technologies.com), specializes in providing cost-effective repair and overhaul solutions for the aerospace and industrial markets. By using innovative and proprietary high-technology repair processes, along with repair solutions licensed from OEMs, the company saves its customers from having to purchase costly replacement parts. It services a broad range of components, including gas turbine engines, critical airframe parts, gates and seats used in oil fields, specialized provider of services to the power generation industry, and components used in other industrial high-wear, high-heat and highly corrosive environments.
