PAS TECHNOLOGIES GETS \$2.1 MILLION AIR FORCE DEAL

Kansas City, MO., – August 2, 2007 – PAS Technologies Inc announced today that it had been awarded a \$2.1-million contract for the remanufacturing and *Super D-Gun*[™] recoating of the General Electric F110 1st Stage Fan Blades at their Kansas City, Missouri facility.

The contract was issued by Department of the Air Force, Tinker Air Force Base, Oklahoma. It covers a quantity of 24,000 F110 1st Stage Fan Blades for a five-year ordering period.

The company is expected to complete the work by August 2012.

The F110 engines are used to power the F-16 Fighting Falcon which is a USAF first line of defense aircraft weapon system. Conceived as an alternative to the Pratt & Whitney F100, the F110 is designed to provide high performance, improved reliability, and sharply reduced operation and support costs.

A privately held corporation headquartered in North Kansas City, Missouri, PAS Technologies Inc. (www.pas-technologies.com), specializes in providing cost-effective repair and overhaul solutions for the aerospace and industrial markets. By using innovative and proprietary high-technology repair processes, along with repair solutions licensed from OEMs, the company saves its customers from having to purchase costly replacement parts. It services a broad range of components, including gas turbine engines, critical airframe parts, gates and seats used in oil fields, specialized provider of services to the power generation industry, and components used in other industrial high-wear, high-heat and highly corrosive environments.
