JACK ROCKSTAD NAMED GENERAL MANAGER FOR COMPRESSOR, BEARING AND TURBINE PRODUCTS FOR PAS TECHNOLOGIES

Kansas City, Mo. – April 9, 2007 – PAS Technologies Inc., announced that Jack Rockstad has been named general manager for compressor, bearing and turbine products including the coatings department and shared services for the North Kansas City, Missouri campus. Rockstad, who will report to Philip Milazzo, senior vice president and general manager, was previously Operations Manager with Smiths Aerospace. Jack is a member of the United States Technical Advisory Group on ISO14000 and has implemented over 30 certified Environmental Management Systems. His career spans 20 years of delivering high-quality process improvement and cost reduction.

Jack Rockstad

“Jack has distinguished himself as a strong leader who delivers exceptional results,” said Robert B. Weiner, PAS Technologies president and chief executive officer. “His broad knowledge and understanding of the aerospace industries provide the necessary skills and experience to position PAS Technologies for now and the future.”

Rockstad earned his B.A. in management from Atlantic Intercontinental University, Chicago, Illinois

PAS Technologies Inc. (www.pas-technologies.com), a privately held corporation headquartered in North Kansas City, Mo., specializes in cost-effective repair and overhaul solutions for aerospace and industrial markets. Through innovative and proprietary high technology repair processes, along with repair solutions licensed from OEMs, the company helps its customers eliminate the need to purchase costly replacement parts. PAS Technologies services a broad range of components, including gas turbine engines, critical airframe parts, gates and seats used in oil fields, and industrial components used in other high-wear, high-heat and corrosive environments.
