PAS TECHNOLOGIES' LEADERSHIP AT MANUFACTURING EXCELLENCE'S LEAN CONFERENCE

Kansas City, MO., – September 3, 2009—PAS Technologies' company President and CEO, Robert Weiner, is among the featured presenters at the 2009 Association for Manufacturing Excellence (AME) International Lean Conference. Held October 19-23 in Covington, Kentucky, Weiner will address leaders from 2,500 manufacturing companies.

Weiner's CEO Leadership Presentation "*Formula for Lean Implementation Success*" is scheduled for October 22 at 9:00 a.m and is offered as part of the conference's educational sessions on "Lean Enterprise Leadership". Lean manufacturing requires disciplined leadership to visualize and streamline work processes that minimize waste and maximize value. PAS Technologies' facility in Hillsboro, Ohio is one of the 40 audited best practices plant tours sharing their best practices for this year's AME Lean Conference.

Weiner will reveal how PAS Technologies, an independent leader in aviation maintenance, repair and overhaul of component parts, immersed itself and its employees to improve efficiencies and value. During the presentation, Weiner will share how the implementation of a Lean culture at PAS Technologies challenged the workforce, empowering employees, and improving job satisfaction, while preserving the company's reputation for superior quality, craftsmanship, attention to detail, and innovative and unique technology solutions.

Weiner has more than 35 years of knowledge and solid experience implementing global Lean production systems. A graduate of the prestigious GE Manufacturing Management Program, he is one of only a handful of GE executives to travel to Japan to study the Lean manufacturing movement there. Bob was named a finalist in the 2009 *Ernst & Young Entrepreneur of the Year Award® in the Central Midwest region*, and he received the *WCBF Global Six Sigma award for Best Emerging Business Improvement Deployment* in 2008.

News Release

For Immediate Release

The Association for Manufacturing Excellence and the world's leading manufacturers are returning to Covington, Kentucky, where the AME started 25 years ago. More information is available on the AME website at <http://www.ameconference.org>.

A privately held corporation headquartered in North Kansas City, Missouri, PAS Technologies Inc. (www.pas-technologies.com), specializes in providing cost-effective repair and overhaul solutions for the aerospace, oilfield and industrial markets. By using innovative and proprietary high-technology repair processes, along with repair solutions licensed from OEMs, the company saves its customers from having to purchase costly replacement parts. It services a broad range of components, including gas turbine engines, critical airframe parts, gates and seats used in oil fields, specialized provider of services to the power generation industry, and components used in other industrial high-wear, high-heat and highly corrosive environments.
