PAS TECHNOLOGIES SIGNS AGREEMENT TO REPAIR AND OVERHAUL PRATT & WHITNEY ENGINE COMPONENTS

Kansas City, Mo., – April 16, 2007 – PAS Technologies Inc. today announced that it has signed a global strategic alliance agreement for repair of engine parts and components with United Technologies Corporation, Pratt & Whitney Division that extends the companies' alliance relationship for an additional five years. Since the alliance began in 1993, PAS Technologies has been a preferred service facility for the overhaul and repair of specific components from global P&W facilities.

“PAS Technologies continued ability to provide high quality parts and engineering services enables us to further our relationship with a valued customer like Pratt & Whitney,” said Brian Rasmussen, vice president sales and marketing for PAS Technologies. “We’re very pleased to renew our special teaming relationship with Pratt & Whitney. We look forward to supporting the company’s drive to improving process performance through world-class manufacturing techniques utilizing Kaizen initiatives for quality control, flowlines, and standard work.”

PAS Technologies Inc. (www.pas-technologies.com) is a privately held corporation headquartered in North Kansas City, Missouri specializing in providing cost-effective repair and overhaul solutions for the aerospace and industrial markets. By using innovative and proprietary high-technology repair processes, along with repair solutions licensed from OEMs, the Company saves its customers from having to purchase costly replacement parts. The broad range of components serviced includes gas turbine engines, critical airframe parts, gates and seats used in oil fields and industrial components used in other high-wear, high-heat, and corrosive environments.
