## **PAS TECHNOLOGIES SECURES MULTI-YEAR AIR FORCE CONTRACT**

**Kansas City, MO., – March 5, 2008** – PAS Technologies Inc announced today that it had been awarded a multi-year contract for the remanufacture and repair of TF33 Seal Seats at their Kansas City, Missouri facility. The TF33 engine equips the United States Air Force fleet of B-52 and KC-135E aircraft.

The contract was issued by Department of the Air Force, Tinker Air Force Base, Oklahoma for a five-year ordering period. The company is expected to complete the work by March 2012.

Robert Weiner, President and CEO of PAS Technologies comments: "This important win follows on the heels a number of contract gains in the engine aftermarket sector and marks our growing success in this field. We are determined to increase our aftermarket activity significantly over the next 5 years using our expertise and performance record to deliver both on cost and performance."

A privately held corporation headquartered in North Kansas City, Missouri, PAS Technologies Inc. ([www.pas-technologies.com](http://www.pas-technologies.com)), specializes in providing cost-effective repair and overhaul solutions for the aerospace and industrial markets. By using innovative and proprietary high-technology repair processes, along with repair solutions licensed from OEMs, the company saves its customers from having to purchase costly replacement parts. It services a broad range of components, including gas turbine engines, critical airframe parts, gates and seats used in oil fields, specialized provider of services to the power generation industry, and components used in other industrial high-wear, high-heat and highly corrosive environments.
