PAS TECHNOLOGIES APPOINTS SALES & MARKETING DIRECTOR FOR ASIA PACIFIC

Kansas City, MO., – April 13, 2010 – PAS Technologies Inc. has hired Terry Teo as Sales and Marketing Director for Asia Pacific. In this role, he will have responsibility for the Sales and Marketing activities of PAS Technologies in the Asia Pacific region.

Terry Teo

Mr. Teo's role is to grow the PAS Technologies business for commercial aviation, military/defense, and industrial gas turbines in the Asia Pacific Markets and will report to Thomas Tan, Senior Vice President for PAS Technologies and Managing Director for AST.

Mr. Teo has been in the aviation business for over 17 years. He started as an airline support manager for Goodrich Aerostructures. Most recently he was Vice President Product Development with Aeronimbus Pte Ltd. His career includes working for Pratt & Whitney, Goodrich, Cathay Pacific Airways, Triumph Aerospace in Thailand, A-Sonic Aerospace, and Flight Focus Pte Ltd. His diverse sales background spans a wide segment of the aviation industry which includes engineering/technical duties and held various positions in management, sales, business development and account/product management. His knowledge and strong customer relationship in the Asia Pacific region will help PAS gain a stronger foothold in the region.

Mr. Teo completed his Bachelor in Engineering from the University of Bradford UK with an Upper Second Class Honours degree and obtained his Safety Investigation Course at the University of Southern California.

Asian Surface Technologies Pte. Ltd, (AST) is a Singapore-based joint venture company between PAS Technologies, SIA Engineering Company, and Pratt & Whitney. The company provides repair and overhaul of aviation components for commercial aircraft as well as high performance surface coatings and finishing for oilfield and aviation OEM components.

A privately held corporation headquartered in North Kansas City, Missouri, PAS Technologies Inc. (www.pas-technologies.com), specializes in providing cost-effective repair and overhaul solutions for the aerospace and industrial markets. By using innovative and proprietary high-technology repair processes, along with repair solutions licensed from OEMs, the company saves its customers from having to purchase costly replacement parts. It services a broad range of components, including gas turbine engines, critical airframe parts, gates and seats used in oil fields, specialized provider of services to the power generation industry, and components used in other industrial high-wear, high-heat and highly corrosive environments.
