## **GERARD HURLEY HIRED AS NEW GENERAL MANAGER FOR PAS TECHNOLOGIES IRELAND LTD**

**Kansas City, MO., – October 10, 2011** – PAS Technologies Inc. welcomes Gerard Hurley as General Manager for PAS Technologies Ireland Ltd., located in Carrigtwohill, Cork, Ireland. His responsibilities include business development, operations, continuous improvement, and P&L management.

Gerard Hurley

Gerard brings a wealth of senior leadership in production, operations, and quality. Most recently, he was Plant Manager at Hamilton Sundstrand, Shannon with responsibility for operations and growth. Gerard joined Hamilton Sundstrand in 1997 as Production Manager. In 2001 Gerard was named Plant Manager where he improved the organization's performance through lean manufacturing techniques and business process improvements. His career includes Power Convertibles, EG&G Electro Optics, CPT Ireland, Atari, & EI Ltd.

Phil Milazzo, President and CEO of PAS Technologies Inc. stated, "Gerard has an impressive 33 year record of helping companies improve performance and identify opportunities for growth. He is an excellent fit our our team and will play a key role in advancing PAS Technologies' industry position and enhancing customer value."

Gerard holds Diplomas in Total Quality Management and Production Management from the Limerick Institute of Technology and the University of Limerick.

PAS Technologies Ireland Ltd. is based in Carrigtwohill, Cork, Ireland and is recognized as a global leader in providing specialized manufacturing and refurbishment services to the power generation industry. Its capabilities focus on heavy industrial turbine (HIT) and light industrial turbine (LIT) markets, and its operations also provide high-technology, specialized coatings for major aerospace OEMs.

PAS Technologies Inc. ([www.pas-technologies.com](http://www.pas-technologies.com)) is a privately held corporation headquartered in North Kansas City, Missouri specializing in providing cost-effective repair and overhaul solutions for the aerospace and industrial markets. By using innovative and proprietary high-technology repair processes, along with repair solutions licensed from OEMs, the Company saves its customers from having to purchase costly replacement parts. The broad range of components serviced includes gas turbine engines, critical airframe parts, gates and seats used in oil fields and industrial components used in other high-wear, high-heat, and corrosive environments.
