PAS TECHNOLOGIES ROMANIA SRL LANDS ISO CERTIFICATION

Kansas City, MO., – April 23, 2009 – PAS Technologies Romania SRL has received ISO 9001:2008 certification for its coatings and surface treatments as well as metal, machining and general mechanical operations.

An onsite coatings facility within Cameron Romania SA, the largest manufacturer of gate valves and wellheads within the Cameron group, PAS Technologies' presence in Romania is the result of the partnership agreement with Cameron to provide industrial coating and finishing of oilfield components.

"We congratulate the people in our Romania facility for achieving this major accomplishment in a very short period of time. We are committed to providing our customers with high-quality products and services and this ISO accreditation is recognition of our efforts in this area," said Robert Weiner, President and CEO of PAS Technologies Inc.

PAS Technologies Romania has managed to put in practice a solid quality system which has been audited and certified by TUV Austria Cert GMBH, one of the most renowned ISO auditors in Europe. Among others, TUV Austria is also the selected auditor for Petrom, the largest player in the oil market in Romania, also one of the most important customers for Cameron gate valves. The ISO 9001:2008 certification comes as a confirmation of the quality provided by PAS Technologies Romania and also opens the opportunity for more business with different customers.

"A lot of people have trained and worked together through the initial start up phase to accomplish this certification in an impressive six-month time period," said Dan Fayer, Vice President Quality, Process Engineering and Lean for PAS Technologies Inc. "A quality-based culture is an important characteristic of a successful company, and this certification underscores our commitment to quality throughout our organization including product development, manufacturing, market launch and support."

About ISO 9001:2008

ISO 9001:2008 specifies requirements for a quality management system where an organization needs to demonstrate its ability to consistently provide product that meets customer and applicable statutory and regulatory requirements; and aims to enhance customer satisfaction through the effective application of the system, including processes for continual improvement of the system and the assurance of conformity to customer and applicable statutory and regulatory requirements.

A privately held corporation headquartered in North Kansas City, Missouri, PAS Technologies Inc. (www.pas-technologies.com), specializes in providing cost-effective repair and overhaul solutions for the aerospace, oilfield and industrial markets. By using innovative and proprietary high-technology repair processes, along with repair solutions licensed from OEMs, the company saves its customers from having to purchase costly replacement parts. It services a broad range of components, including gas turbine engines, critical airframe parts, gates and seats used in oil fields, specialized provider of services to the power generation industry, and components used in other industrial high-wear, high-heat and highly corrosive environments.
